## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Frozen Blueberries competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Frozen Blueberries refer to blueberries that have been washed, graded, destemmed and inspected before being frozen through industrial quick-freezing processes. The product is typically available in whole-berry, broken-berry and mixed-grade formats, offered in various sizes, color grades, maturity levels and specifications aligned with USDA or international export standards. The freezing process preserves the skin integrity, internal structure, natural anthocyanin content and flavor profile of the fruit, enabling consistent quality during storage and long-distance transportation, making frozen blueberries an essential ingredient for industrial food applications. Compared with fresh blueberries, frozen blueberries offer year-round availability, reduced waste, high standardization and strong operational consistency. They are widely used in jams, bakery and dessert products, yogurt and dairy applications, smoothies, frozen fruit blends, functional foods and ready-to-eat healthy snacks. Major producing regions include the United States, Canada, Chile, Peru, Poland and China, all supported by mature cultivation systems and well-developed cold-chain infrastructure. Frozen blueberries are one of the highest-value categories within the global frozen berry trade and play a key role in the food manufacturing sector. Based on industry databases, export statistics from major blueberry-producing regions and verified processor interviews, global frozen blueberry production in 2024 is estimated at 0.55-0.80 million tons, driven by varietal differences, regional climate conditions and harvest cycles. The weighted-average FOB price generally ranges from USD 2,000 to 3,200 per ton, depending on grade and specification.

The global Frozen Blueberries market size was estimated at USD 1500.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
