Abstracts

Fruit and vegetable cleaners are specialized cleaning agents designed to remove surface contaminants—including pesticides, waxes, dirt, and microbial pathogens—from fresh produce more effectively than water alone. These products typically come in liquid, spray, or powder form and often contain food-grade surfactants, natural acids, or antimicrobial ingredients that break down and lift residues without leaving harmful traces. Unlike general-purpose soaps or detergents, they are formulated to be safe for direct food contact and rinse off easily, aligning with consumer demand for both cleanliness and chemical safety in food preparation.

The global Fruit And Vegetable Cleaner market size was estimated at USD 520.75 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
