Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Fuel Gas Supply Systems (FGSS) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. The fuel gas supply system (FGSS) is a gas-propelled ship's fuel supply system. It is a system that makes LNG and BOG within the ship's tank into a condition of engine fuel supply. The fuel gas supply system consists of an LNG fuel tank, an LNG pumping system, a BOG compressing system, an LNG heating system, a BOG heating (cooling) system, a heating medium circulation system, a bunkering system, and a venting system. The FGSS Module industry can be broken down into several segments, Low Pressure, High Pressure, etc. Driven by the IMO 2030/2050 emissions reduction regulations, the global fuel gas supply system (FGSS) market is experiencing structural growth. Key manufacturers of fuel gas supply systems (FGSS) include Høglund Marine Solutions, LGM Engineering (Gloryholders), Wartsila, Mitsubishi Shipbuilding, and CSSC. China Shipbuilding Group primarily includes Qingdao Shuangrui, 708 Research Institute, Guangzhou Shipyard International, and 711 Research Institute. The top five manufacturers hold over 95% of the global market share. Market share fluctuates significantly from year to year, primarily driven by backlog orders. Asian shipyards dominate demand, with China, Japan, and South Korea accounting for 90% of global orders for new dual-fuel vessels. With the surge in global demand for new energy vehicles, PCTC vessel construction has seen explosive growth. Due to relatively stable shipping routes, newly implemented PCTC vessels worldwide in recent years have all used LNG and other alternative fuels as their primary fuel, primarily in the downstream market. Selecting FGSS manufacturers with robust product technology, reliable quality, and guaranteed service has become a strong priority for downstream manufacturers.

The global Fuel Gas Supply Systems (FGSS) market size was estimated at USD 1345.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 19.80% during the forecast period.
