The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Full-Scene AR-HUD competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Full-scene AR-HUD is a new type of intelligent display terminal that integrates technologies such as laser projection, DLP/LCoS microdisplay, optical waveguide, perception fusion and high-precision map.
