Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Functional Polyester Film competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Polyester film is a polymer film material with excellent comprehensive performance. It has a series of characteristics such as high mechanical strength, high transparency, chemical corrosion resistance, low air permeability, non-toxicity, good temperature resistance, folding resistance and excellent electrical insulation. Ordinary polyester film is mainly used in packaging and printing. In recent years, with the further exploration of its optical properties, electrical properties, mechanical properties, thermal properties and surface properties, various functional polyester films have emerged and further applied to electronic and electrical, optoelectronic display, new energy, consumer electronics, automobiles, construction and other industrial fields. According to relevant data, polyester film has nearly 2,000 application scenarios. Compared with general polyester film (mainly used for product packaging), the production of special functional polyester film is much more complicated in terms of raw material formula, process requirements, production line design, etc. According to the thickness range, polyester film can be divided into ultra-thin film, thin film, medium film and thick film. Among them, thin film and medium film are generally classified as general film, with a thickness usually between 6-65um, mainly used in packaging, printing and other fields, while ultra-thin film and thick film are used as special film, mainly used in electronics, new energy, automobile and other industrial fields.

The global Functional Polyester Film market size was estimated at USD 2090.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.00% during the forecast period.
