Abstracts

Fused quartz is a non-crystalline (glass) form of silicon dioxide (quartz, sand). It lacks long range order in its atomic structure. Its highly cross-linked three-dimensional structure gives it a high using temperature and low thermal expansion coefficient. In optics, fused silica glass has a high transmittance from ultraviolet to near-infrared (185nm-00nm). Coupled with low refractive index variations, it exhibits ideal optical qualities for high-precision optics applications. In addition, the physical properties of fused silica glass make it particularly useful for high-performance applications in harsh conditions. This report mainly focuses fused quartz optics market. The key manufacturers of Fused Silica Optical Components in the world are UNI Optics, Edmund Optics, sphericon, Shanghai Optics, CLZ Precision Optics, Esco Optics, OPCO Laboratory and Eicoptik, among which the market share of the top five manufacturers exceeds 25%, and Shanghai Optics is the largest manufacturer. The global production of fused silica optical components is mainly distributed in North America, Europe and China, among which the top three production regions account for more than 90% of the market share.

The global Fused Quartz Optics market size was estimated at USD 279.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.80% during the forecast period.
