## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Gain-Flattened Distributed Raman Amplifier competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Global sales of gain-flattened distributed Raman amplifiers (DRAs) will reach approximately 7,800 units in 2024, with an average price of approximately \$12,950 per unit and an industry gross profit margin of approximately 38%?42%. Gain-flattened distributed Raman amplifiers utilize the optical fiber itself as the amplification medium, achieving distributed Raman gain through reverse or bidirectional injection of pump light. These amplifiers effectively compensate for signal attenuation, improve the signal-to-noise ratio (SNR), and extend relay distances over long-haul transmission. Unlike traditional erbium-doped fiber amplifiers (EDFAs), DWDM distributed Raman amplifiers distribute the amplification region throughout the entire fiber link, reducing the system noise figure by 2?5 dB. They are widely used in backbone DWDM systems, transoceanic optical cables, ultra-long-haul data center interconnects (DCIs), and quantum communication networks. A typical DRA is deployed every 500?700 kilometers along a typical optical cable trunk, cascaded with an EDFA to form a hybrid amplification architecture. Upstream raw materials primarily include high-power pump lasers, germanium-doped/erbium-doped fibers, wavelength division combiners (WDMs), optical isolators, and temperature-controlled heat sinks. These components account for approximately 55%?60% of the total system cost. A single C-band Raman amplifier provides over 15 dB of on/off gain flatness across the 1525nm to 1565nm wavelength range, with a gain flatness of

The global Gain-Flattened Distributed Raman Amplifier market size was estimated at USD 101.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.20% during the forecast period.
