Abstracts

The Gallstone Extraction Basket is a specialized medical device used in endoscopic procedures, particularly during ERCP (Endoscopic Retrograde Cholangiopancreatography), designed to capture and remove gallstones or other biliary obstructions from the bile ducts; it typically consists of a flexible wire basket that can be opened and closed via a handle mechanism, deployed through the working channel of an endoscope to ensnare stones, which are then extracted from the body, reducing the need for more invasive surgical interventions. The global market for these devices is primarily driven by the rising incidence of gallstone-related disorders, such as cholelithiasis and choledocholithiasis, an aging population more prone to biliary conditions, and advancements in minimally invasive endoscopic techniques that favor basket utilization due to their efficacy, safety, and cost-effectiveness compared to traditional surgery; key market segments include disposable versus reusable baskets, with growing preference for single-use variants to minimize infection risks, and geographical demand concentrated in North America and Europe due to high healthcare expenditure and procedural volumes, though emerging economies in Asia-Pacific are witnessing rapid growth owing to improving healthcare infrastructure and increasing awareness. Major players, such as Boston Scientific, Cook Medical, and Olympus Corporation, dominate through continuous innovation in basket design?such as enhanced flexibility, better stone capture rates, and compatibility with various endoscope sizes?while facing competition from alternative stone removal methods like laser lithotripsy and mechanical lithotripters; regulatory frameworks, including FDA approvals in the U.S. and CE marking in Europe, alongside reimbursement policies, significantly influence market accessibility and adoption rates.

The global Gallstone Extraction Basket market size was estimated at USD 85.4 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.80%
