Abstracts

Game outsourcing services refer to a form of cooperation in which a game development company or game studio entrusts part or all of the content of game production to another external company or individual. These outsourcing companies or individuals usually have specialized skills and experience and can provide various game development-related services, including programming, art design, sound effect production, testing and quality assurance. Game outsourcing services can cover different fields and links, such as graphic design, including character modeling and animation, scene design, special effects production, etc.; audio production, including sound effect design and music creation. In addition, game outsourcing services can also involve game testing and quality assurance to ensure that the game has a good user experience and stability before release. Through game outsourcing services, game development companies or studios can manage the game production process more effectively in terms of time and resources, and obtain professional technical support and high-quality output. At the same time, outsourcing can also help development companies flexibly allocate resources and control costs between different projects to meet market demand and improve competitiveness. Driven by the continued expansion of the global game industry, the game art outsourcing service market has shown a strong growth trend. In 2024, this segment will dominate the game outsourcing market with an absolute share of 48.23%, forming a three-legged pattern with game programming outsourcing (34.43%) and content design outsourcing (13.29%). This structural advantage stems from the significant advantages of art outsourcing in technology standardization, cost-effectiveness and talent reserves, enabling game manufacturers to effectively reduce R&D costs while focusing the core team on strategic areas such as gameplay innovation and engine development. It is worth noting that with the improvement of the self-developed engine capabilities of leading manufacturers, the art outsourcing market is shifting from explosive growth to a technology-driven high-

quality development stage. It is expected that the compound growth rate will stabilize at around 9.7% in the next five years, and continue to provide the industry with modular and iterative next-generation art solutions.

The global Game Outsourcing Services market size was estimated at USD 8645.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.10% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Game Outsourcing Services market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
