Abstracts

Game Simulation Gear refers to a specialized set of equipment and tools designed to enhance the immersive experience of video gaming. This gear typically includes hardware such as VR (Virtual Reality) headsets, motion-sensing devices, haptic feedback systems, steering wheels, flight controllers, and other peripherals that simulate real-life actions within the digital gaming world. These tools are designed to provide a more realistic, interactive, and engaging gaming experience by replicating physical sensations, movements, and environments in a virtual setting. The primary purpose of game simulation gear is to create an environment that allows gamers to feel as if they are truly part of the game, whether they are flying an aircraft, driving a car, or exploring an entirely new virtual world. From the production side, China, Europe and Japan are important production areas. It is expected that China will maintain the fastest growth rate in the next few years, and the share is expected to reach 5.5% in 2030. From the perspective of product types, arcade joysticks occupy an important position, and the share is expected to reach 63.5% in 2030. However, affected by the popularity of aviation simulation flight games, the growth rate of flight joysticks will be faster in the next few years. From a global perspective, the share of flight joysticks in the US and European markets is higher. At the same time, in terms of application, unlike game controllers, game joysticks are usually used in more professional gaming fields. Therefore, game joysticks are more used in professional game consoles such as PlayStation, Xbox, Nintendo, etc. Therefore, the share used for game consoles is higher, and the share used for game consoles is about 79.6%, and the CAGR in the next few years is about 5.3%. From the perspective of manufacturers, globally, the core manufacturers of game joysticks mainly include HORI, Logitech, Thrustmaster, Nacon, Mad Catz, PXN and Qanba, etc. The world's first-tier manufacturers include HORI, Logitech, Thrustmaster and Nacon, which account for approximately 35% of the market share; the second-tier manufacturers include Mad Catz, PXN and Qanba, which

together account for 25% of the market share.

The global Game Simulation Gear market size was estimated at USD 855.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.00% during the forecast period.
