The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on GaN and SiC Power Device competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. This report studies the GaN Power Devices and SiC Power Devices. In terms of market size, currently, GaN power devices are about one-tenth of SiC power devices. Gallium nitride (GaN) is used as the wide band gap material for next generation power semiconductors and high frequency devices. SiC (silicon carbide) is a compound semiconductor composed of silicon and carbide. SiC provides a number of advantages over silicon, including 10x the breakdown electric field strength, 3x the band gap, and enabling a wider range of p- and n-type control required for device construction. Silicon Carbide (SiC) devices are widely used in automotive, EV charging, industrial motor/drive, PV, energy storage, wind power, UPS, data center & server and rail transport, etc. In automotive, SiC power devices are mainly used in automotive main inverter, on-board chargers (OBC) and DC/DC converter. and the SiC power devices market was dominated by STMicroelectronics, Infineon, Wolfspeed, Rohm, Onsemi, BYD Semiconductor. SiC Power Devices are mainly used in Automotive Main Inverter, On-Board Chargers and DC/DC Converter. and the SiC power devices market was dominated by STMicroelectronics, Infineon, Wolfspeed, Rohm, Onsemi, BYD Semiconductor. GaN power devices have grown rapidly in recent years, and a large number of companies have gradually entered the industry. GaN power devices are currently mainly used in consumer electronics, such as mobile phone fast charging, adapters, etc. In the automotive, the entry point of GaN power devices is the on-board charger (OBC). Currently, the GaN power devices are dominated by Innoscience, Infineon (GaN Systems), Power Integrations, Inc., Navitas Semiconductor, Efficient Power Conversion Corporation (EPC), and Renesas Electronics (Transphorm), among
