## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Gas Pole Chainsaws competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Gas pole chainsaw is a portable garden tool powered by gasoline and used for pruning branches at high altitudes. It consists of a retractable long pole and a small gasoline chain saw mounted on the top of the pole, allowing operators to cut branches at high altitudes on the ground without the aid of a ladder. Gas pole chainsaws have the advantages of strong power, long working hours, and no power supply restrictions. They are widely used in orchard pruning, park maintenance, forestry clearing, and gardening projects. Compared with electric or battery pole saws, gasoline models are suitable for professional working environments that require higher cutting force and battery life.

The global Gas Pole Chainsaws market size was estimated at USD 67.7 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.20% during the forecast period.
