Gas seal is a non-contact sealing technology specifically designed for shaft ends of rotating machinery. It achieves its sealing function by maintaining a small gap between two relatively moving sealing surfaces and forming a stable gas film by using the gas dynamic pressure effect. This sealing method is different from traditional liquid lubricated mechanical seals, which do not require oil or other liquids as lubricants and cooling media.

The global Gas Seal market size was estimated at USD 564.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Gas Seal market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
