Report Overview

Articulated Dump Truck is a very large heavy-duty type of dump truck used to transport loads over rough terrain, and occasionally public roads. The main body of the dump truck is generally based on that of a flatbed truck, with one axle beneath the cab and anywhere from one to three axles beneath the dump box. The dump box itself generally has a tailgate that is hinged at the top so that it will open automatically when it is being dumped. The dumping mechanism is powered hydraulically in order to prevent compression problems that can sometimes be encountered when using pneumatic systems. The engine of the dump truck can be either gasoline-powered or diesel-powered, this report studies the Gasoline-powered Articulated Dump Truck market.
