Report Overview

Fuel stabilizer keeps gasoline, especially gas with ethanol (E10, E15), from going bad in a vehicle being stored for a half-year or more. Dry gas is the generic term for an additive that works to keep water in the tank or fuel lines from freezing. Using gasoline stabilizer eliminates the need to drain fuel prior to storage by keeping fuel fresh for up to 24 months, and ensures quick easy starts next season by preventing gum and varnish build-up within your engine's fuel system.
