Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Gigabit Unmanaged Switch competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Gigabit Unmanaged Switch production reached approximately 480k units, with an average global market price of around US\$ 1.75 k per unit. A Gigabit Unmanaged Switch is a network device based on Ethernet technology that supports 10/100/1000 Mbps auto-negotiation, primarily used for interconnecting multiple devices within a local area network (LAN). It requires no configuration or management software and offers plug-and-play functionality, making it ideal for home networks, small offices, surveillance systems, and industrial automation environments. These switches typically adopt a store-and-forward architecture, support full-/half-duplex modes, auto MDI/MDIX detection, low power consumption, and IEEE 802.3x flow control for stable and reliable data transmission. Compared to managed switches, they feature lower cost, easier deployment, and minimal maintenance requirements. The upstream of gigabit unmanaged switches mainly includes suppliers of raw materials such as network chips, PCB circuit boards, metal casings, transformers, crystal oscillators, capacitors, inductors, and plastic casings. Major chip suppliers include Broadcom, Realtek, Marvell, Intel, Qualcomm, and MediaTek. Downstream applications are wide-ranging, covering home broadband routing, enterprise LANs, video surveillance systems, smart buildings, and data acquisition and control systems. The annual production capacity of a single-line Gigabit Unmanaged Switch is approximately 6k units, with a gross profit margin of approximately 25%-40%.

The global Gigabit Unmanaged Switch market size was estimated at USD 840.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 11.80%

during the forecast period.
