Abstracts

Glass wool is made from recycled glass and fused sand, such as soda ash, limestone, and sand, which helps in trapping air and blocking heat, noise, and cold. This property of this material is embraced of lightweight, pest-proof, and flexible, due to which it is widely used in electrical and thermal insulation purpose in buildings. The material is spread in an attic to balance temperature inside the building. Glass wool absorbs sonic energy and is utilized to enhance the acoustic performance of ceilings, walls, roofs, and floors.
