Report Overview

Glassfibre Reinforced Concrete (GRC) is a type of fiber-reinforced concrete. Glass fiber concretes are mainly used in exterior building facade panels and as architectural precast concrete. Somewhat similar materials are fiber cement siding and cement boards. Glassfibre Reinforced Concrete consists of high-strength, alkali-resistant glass fiber embedded in a concrete matrix.

The commercial construction application is projected to lead the GRC market during the forecast period, in terms of value and volume. The growth of the commercial construction application can be attributed to the increasing use of GRC in buildings, such as offices, institutes, hospitals, gymnasiums, cinema theatres, museums, and auditoriums.
