Abstracts

Glassware is defined as a container or object made of glass and used primarily for commercial and residential purposes. It includes drinking utensils, tableware and other useful practical products as well as mushroom shaped, candle containers. Glassware industry concentration is not high; There are more than 100 manufacturers in the world, and high-end products are mainly from the United States and Western Europe. The world's biggest manufacturers are mainly in the United States and the European Union. Products from manufacturers such as Libbey are of relatively high quality. As for France, ARC International has become a global leader. Most Chinese manufacturers are located in anhui, shandong and zhejiang provinces. Many companies have multiple factories, often located close to their target consumption areas. Other international companies have factories in China, such as libbey's in langfang, not far from Beijing. In addition to the asia-pacific region, the main consumer market is located in Europe and the United States and other developed countries. Europe had a market share of 30.76 percent, followed by North America at 24.73 percent in 2017. We tend to think that as the industry becomes more mature, consumption growth will flatten out.

The global Glassware market size was estimated at USD 4662.64 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 0.01% during the forecast period.
