Report Overview

A Global Distribution System (GDS) is a computerized network operated by a company that enables transactions between travel service providers?such as airlines, hotels, car rental companies, and cruise lines?and travel agencies or online travel agents (OTAs). It serves as a crucial B2B intermediary platform, providing real-time access to inventory, schedules, pricing, and booking functionalities across multiple suppliers. Unlike direct distribution channels, GDS consolidates offerings from numerous providers, allowing travel intermediaries to compare, book, and manage travel services efficiently.
