Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on GNSS Module for Drone competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global GNSS Module for Drone production reached approximately 2,219 k units, with an average global market price of around US\$ 137.9 per k unit. The GNSS (Global Navigation Satellite System) module is one of the "eyes" and "sensory organs" of the drone, and is the core component that enables it to achieve functions such as precise positioning, autonomous flight, stable hovering and intelligent return. The upstream sector primarily includes chipsets and core components. The chipset is the core component responsible for receiving, processing, and decoding satellite signals, outputting position, velocity, and time information. Major manufacturers include Qualcomm and Broadcom in the United States, Sinan Navigation in Canada, u-blox in Switzerland (which also designs its own chips), and Huada Beidou, Zhongkewei, and Taidou Microelectronics in China. Core components include GNSS antennas, passive components, crystal oscillators, and memory. The downstream sector represents the value creation end of the supply chain, namely drone manufacturers and the various industries they serve. Drone manufacturers such as DJI are among the largest purchasers of GNSS modules. DJI typically collaborates closely with upstream chip and module manufacturers, even customizing specific module models to achieve the optimal balance between performance and power consumption. Industrial and military drones place extremely high demands on GNSS module reliability, anti-interference performance, accuracy, and confidentiality, and often utilize higher-specification modules or customized solutions.

The global GNSS Module for Drone market size was estimated at USD 306.0 million in

2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.30% during the forecast period.
