Report Overview

Golf clubs are the tools we use to strike the golf ball. A golf club has three components — the Head, the Shaft and the Grip. The rules of golf constrain golf club designs, but the goal of clubmakers is to create golf clubs, within those constraints that maximize the physics behind a golfer's swing while allowing for some range of swing error to provide an accurate, long, and forgiving shot. The better your swing, the less forgiving club you require whereas the more your swing needs work, the better off you are with a more forgiving club design. A modern set of golf clubs typically consists of three woods (the 1-driver, 3, and 5), at least 1 hybrid (3H) seven irons (4, 5, 6, 7, 8, 9, and PW), and a putter. This gives you a total of twelve clubs. The rules of golf allow you to carry fourteen clubs in your bag, so many golfers add another wedge or specialty hybrid.
