Granulator knives are specialized industrial cutting tools designed for size reduction processes, primarily used in plastic recycling, pharmaceutical manufacturing, and food processing industries. These high-precision blades are engineered to cut, shred, or granulate materials into smaller, uniform particles, often integrated into granulators, shredders, or pelletizers. Typically made from hardened steel, tungsten carbide, or other durable alloys, they are built to withstand high friction and repetitive stress while maintaining sharpness. Their design varies based on application?rotary knives for continuous granulation, stationary bed knives for fixed cutting, or segmented blades for heavy-duty processing.
