Abstracts

This report focus on Graphite Felts market. Graphite Felts (GFs) are widely used due to their electrochemical activity, high permeability for liquids, high surface area and relatively low cost. Carbon and graphite felts find wide applications due to their properties such as high thermal insulation, broad operational range, chemical stability, and lightweight. APAC was the fastest-growing carbon felt and graphite felt market, in terms of value and volume. The increasing demand for carbon and graphite felts from the emerging economies and rising government spending on infrastructural projects are the main factors contributing to the market growth in APAC. The increasing demand for high-performance batteries and improved performance of carbon fiber in high temperature applications are driving the carbon felt and graphite felt market. The absence of quality control in developing economies is restraining the market growth.

The global Graphite Felts market size was estimated at USD 134.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 11.00% during the forecast period.
