## Abstracts

A gravity pet feeder is a device designed to automatically dispense dry pet food to pets using the force of gravity. It consists of a food storage container (typically a hopper or bin) that releases food into a bowl or tray as the pet eats. The feeder works by gravity, so as the food level in the bowl decreases, more food flows from the storage container to replenish it, ensuring that pets always have access to food.

The global Gravity Pet Feeder market size was estimated at USD 1027.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.
