## Abstracts

To address the problems of traditional paper greeting cards?time-consuming design, limited styles, inconvenient delivery, and difficulty in personalization?greeting card software emerged. Since the widespread adoption of personal computers and the rise of digital design in the 1990s, the greeting card software industry has undergone continuous innovation and development. Currently, greeting card software has evolved into a diverse range of forms, including online ready-to-use templates, professional design tools, mobile applications, and multimedia interactive greeting cards. It is widely used in personal holiday greetings, corporate customer maintenance, event invitations, educational presentations, and public welfare communication, significantly improving creative efficiency, enriching emotional expression, and providing a convenient digital sharing experience.As an important branch of the digital creative industry, greeting card software is undergoing a transformation from "tool-based" to "ecosystem-based." Through technological empowerment, scenario-based development, and ecosystem integration, the industry is expected to break through homogeneous competition and open up new growth poles in areas such as the emotional economy, digital marketing, and green and low-carbon development. In the future, it is necessary to continue to focus on key trends such as AI design, immersive interaction, and data compliance, and build a collaborative innovation ecosystem of "technology-content-user" to promote high-quality development of the industry.

The global Greeting Card Software market size was estimated at USD 884.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Greeting Card Software market, covering all critical facets from a broad macroeconomic overview to

detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Greeting Card Software market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Greeting Card Software market.

### **Global Greeting Card Software Market: Market Segmentation Analysis**

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.
