Report Overview

Griffonia Seed Extract, also known as 5-HTP (5-Hydroxytryptophan), is a naturally occurring compound derived from the seeds of the Griffonia simplicifolia plant. It is a chemical precursor to the neurotransmitter serotonin, which plays a crucial role in regulating mood, appetite, and sleep. The extract is primarily used as a dietary supplement to support mental health, promote relaxation, and aid in weight management. 5-HTP works by increasing the production of serotonin in the brain, which can help alleviate symptoms of depression, anxiety, and insomnia. Additionally, it may help control appetite by signaling the brain that you are full, potentially aiding in weight loss efforts. Griffonia Seed Extract is considered a safe and effective alternative to synthetic serotonin-boosting medications, as it is derived from a natural source and has fewer side effects.
