## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on GRP Explosion-protected Junction Box competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of GRP Explosion-protected Junction Boxes reached approximately 3.8 million units at an average price of \$120 per unit.

Manufactured from glass fiber reinforced plastic (GRP), these explosion-proof electrical enclosures achieve Ex d IIC T6 or higher protection ratings. With excellent corrosion resistance (acid/alkali/salt spray proof), high strength-to-weight ratio (tensile strength >180MPa) and long-term weather resistance, they are primarily used in petrochemical plants, offshore platforms, pharmaceutical facilities and other explosive hazardous environments. As global industrial safety standards tighten and demand for electrical equipment in harsh environments grows, GRP explosion-proof equipment is gradually replacing some metal alternatives, gaining increasing market share in corrosive applications.

The global GRP Explosion-protected Junction Box market size was estimated at USD 456.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.90% during the forecast period.
