Report Overview

HAA Curing Polyester Resin is a type of polyester resin commonly used in powder coating formulations. This resin contains HAA, which is a cross-linking agent that enhances the curing process of the powder coating through a reaction with epoxy groups. HAA curing polyester resin offers excellent adhesion, chemical resistance, and durability. It is widely used in various industries, including automotive, appliances, and general industrial applications. The HAA curing mechanism allows for a lower curing temperature compared to traditional TGIC curing systems, making it more energy-efficient. This resin provides a cost-effective and sustainable solution for achieving high-quality, long-lasting powder coatings.
