Abstracts

Handmade spectacle frames refer to eyewear frames that are crafted primarily by hand rather than through fully automated industrial processes, emphasizing artisanal techniques, customization, and material authenticity. These frames are often made from high-quality, natural materials such as acetate, wood, horn, or titanium, with production involving meticulous steps like material cutting, shaping, polishing, and assembly, frequently carried out by skilled craftspeople in small workshops or boutique ateliers. The defining characteristics include unique design details, limited production runs, personalized fittings, and a narrative of craftsmanship that differentiates them from mass-produced alternatives, appealing to consumers seeking individuality, luxury, sustainability, and a connection to traditional artisanship in their eyewear choices.
