The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Hard Empty Nutraceutical Capsules competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Hard empty nutraceutical capsules are rigid hollow capsules made from gelatin, hydroxypropyl methylcellulose (HPMC), or other edible plant-based polysaccharides, specifically designed to encapsulate dietary supplements, vitamins, minerals, botanical extracts, and other functional nutritional ingredients. Compared with soft capsules, hard empty capsules offer superior chemical stability and mechanical strength, effectively protecting active ingredients from light, moisture, and oxidation, while allowing precise dosing and large-scale manufacturing. Depending on formulation requirements, hard empty capsules can be designed as immediate-release, sustained-release, or enteric-coated forms to achieve targeted release locations and timing, making them widely used in the dietary supplement and functional food sectors. In 2024, the global sales volume of hard empty nutraceutical capsules reached 1.04 trillion capsules, with an average price of 24 USD per 10,000 capsules.
