Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on HBM IC Tester competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. HBM IC Tester refers to a specialized semiconductor testing system designed for High Bandwidth Memory (HBM) integrated circuits. Since HBM is a 3D-stacked DRAM architecture connected through TSV (Through-Silicon Vias) and used alongside high-performance processors (such as GPUs, AI accelerators, and data center chips), its testing requires advanced IC testers that can validate both electrical performance and 3D packaging integrity. In 2024, global HBM IC Tester production reached approximately 114 units, with an average global market price of around US\$ 260 K USD per unit. The production capacity for HBM IC Tester in 2024 was approximately 130 units. The typical gross profit margin for HBM IC Tester is between 30% and 40%. The HBM IC Tester market focuses on testing solutions designed for High Bandwidth Memory (HBM) integrated circuits, which are widely used in AI accelerators, GPUs, data centers, and high-performance computing. These testers ensure the functionality, reliability, and performance of HBM stacks that integrate DRAM with logic dies through TSV (Through-Silicon Via) technology. The market is driven by the rapid expansion of AI training models, 5G, and cloud infrastructure, which require high-speed, high-capacity memory. Leading players include Advantest, Teradyne and Techwing, among others. Asia, particularly Korea, Taiwan, and China, holds a dominant share due to concentrated HBM production and semiconductor testing ecosystems. The market is expected to maintain strong growth as HBM adoption accelerates in next-generation AI chips and advanced packaging technologies.

The global HBM IC Tester market size was estimated at USD 91.5 million in 2025 and is

projected to grow at a compound annual growth rate (CAGR) of 12.50% during the forecast period.
