## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on HBM Storage Tester competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. An HBM Storage Tester is a specialized electronic testing system designed to evaluate the performance, functionality, and reliability of High Bandwidth Memory (HBM) devices and other advanced memory types such as DRAM, SRAM, or Flash. In 2024, global HBM Storage Tester production reached approximately 114 units, with an average global market price of around US\$ 800 K USD per unit. The production capacity for HBM Storage Tester in 2024 was approximately 130 units. The typical gross profit margin for HBM Storage Tester is between 30% and 40%. The upstream of HBM Storage Tester mainly consists of semiconductor memory manufacturers, probe stations (probers), precision control system suppliers, and automation software developers, which provide the chips to be tested, test interfaces, and control systems. The downstream includes memory packaging plants, IC design companies, electronics manufacturing service (EMS) providers, and research institutions, which use HBM Storage Testers to perform functional testing, performance evaluation, and reliability verification of DRAM, SRAM, Flash, and other memory devices to ensure product compliance and reliability. HBM Storage Tester market is growing rapidly due to increasing demand for high-performance memory in AI accelerators, high-performance computing (HPC), data centers, and advanced graphics applications. Key drivers include the proliferation of HBM2/HBM3/HBM4 in GPUs and AI chips, the need for high-throughput wafer and package-level testing, and rising adoption in data-intensive applications. Leading vendors such as Teradyne, Advantest dominate the market, providing high-speed, high-parallelism test platforms. Market growth is tempered by the high cost and technical complexity of HBM testing equipment, but opportunities exist in emerging AI, HPC, and

automotive applications requiring reliable high-bandwidth memory solutions.

The global HBM Storage Tester market size was estimated at USD 91.5 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.50% during the forecast period.
