Report Overview

An HUD is a display indicator that displays the key flight information onto a transparent screen positioned in front of a pilot's line of sight. HUD finds its applications in the automotive and aviation sectors. It helps increase the situational awareness and enhances safety margins in these sectors. The following are the primary components of an HUD: combiner, projector unit, display panel, and video generator.

The operational benefits of HUDs have encouraged commercial airlines such as China Eastern Airlines and Qatar Airways to equip their new fleets with HUDs. In 2013 China Eastern Airlines placed an order for 58 Boeing Next-Generation 737 aircraft installed with Rockwell Collins' HUD systems; in 2015, Qatar Airways announced that it would install HUDs in its A350 XWBs and A380 aircraft fleets. In the same year, China-based Hainan Airlines also announced the installation of Rockwell Collins' HUD systems in its next-generation Boeing 737 aircraft and flight simulators.
