Abstracts

Heart valve replacement and repair refers to surgical procedures aimed at treating heart valve disease. Replacement involves substituting a diseased or damaged valve with a prosthetic valve, while repair involves reconstructing the existing valve to restore proper function. These procedures are vital for patients with conditions like aortic stenosis, mitral regurgitation, and other valvular diseases.Market Overview:The heart valve replacement and repair materials market is driven by the rising incidence of valvular heart diseases, aging populations, and advancements in both surgical and minimally invasive valve technologies. The adoption of biologically derived valves, as well as the development of less invasive approaches like transcatheter aortic valve replacement (TAVR), are significant drivers.Market Drivers:Increasing prevalence of heart valve diseases due to aging demographics and lifestyle factors.Advancements in surgical techniques and materials, including minimally invasive options like TAVR and robotic surgeries.Growing demand for bioprosthetic valves due to their superior performance and reduced risk of clotting compared to mechanical valves.Market Opportunities:Emergence of next-generation bioprosthetic valves that are more durable and offer improved patient outcomes.Rising demand for minimally invasive interventions, offering less trauma, quicker recovery, and fewer complications.Expansion into emerging markets where the adoption of advanced valve replacement and repair technologies is increasing.Market Limitations:High costs associated with valve replacement procedures, particularly with advanced bioprosthetic valves.The need for regular follow-ups and potential for reoperation, especially in young patients with biologic valves.Limited long-term data for newer valves, which raises concerns about their durability and clinical efficacy.

The global Heart Valve Replacement and Repair Materials market size was estimated at USD 9326.0 million in 2025 and is projected to grow at a compound annual growth
