Report Overview

Heavy Chemical Protective Clothing is a type of personal protective equipment (PPE) that is designed to protect the wearer from exposure to hazardous chemicals, biological agents, or radioactive materials. HCPC is also known as fully enclosed chemical protective clothing, gas-tight chemical protective clothing, or non-ventilated combined chemical protective clothing. HCPC consists of a suit that covers the entire body, including the head, hands, and feet, and a self-contained breathing apparatus (SCBA) that provides a supply of clean air to the wearer. HCPC is usually made of materials that are resistant to permeation, penetration, and degradation by various chemicals, such as butyl rubber, polyethylene, or Teflon. HCPC provides the highest level of protection against chemical hazards, but also poses significant risks to the wearer, such as heat stress, physical and psychological stress, reduced mobility and visibility, and communication difficulties.
