## Abstracts

A hemoglobin test is often used to check for anemia, a condition in which your body has fewer red blood cells than normal. If you have anemia, the cells in your body don't get all the oxygen they need. Hemoglobin tests are measured as part of a complete blood count (CBC) There was a growing trend toward point-of-care hemoglobin testing, allowing for rapid and convenient testing in various healthcare settings, including clinics, primary care offices, and emergency departments. Hemoglobin A1c (HbA1c) testing was increasingly used for the long-term monitoring of blood glucose levels in diabetic patients. This trend was driven by the rising prevalence of diabetes worldwide and the need for effective diabetes management. Hemoglobin testing remained a crucial tool for diagnosing and monitoring anemia, which is a common health issue globally. The demand for accurate and reliable hemoglobin measurement tools was steady.

The global Hemoglobin Testing System market size was estimated at USD 2874.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.90% during the forecast period.
