Abstracts

High mileage motor oil is a specialized lubricant formulated for vehicles with over 75,000 miles on the odometer, designed to address the unique challenges of aging engines by incorporating higher viscosity levels, advanced seal conditioners to prevent leaks, and enhanced additives that reduce oil burn-off, minimize sludge formation, and protect worn components such as piston rings and bearings. These formulations often include antioxidants and detergents to extend engine life and maintain performance under the increased stress and wear typical of high-mileage engines, distinguishing them from conventional motor oils which lack these targeted enhancements.

The global High Mileage Motor Oil market size was estimated at USD 2120.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.
