Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on High-speed Linear Terahertz Camera competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of high-speed linear terahertz cameras reached 3,200 units, with an average selling price of US\$145,000 per unit. High-speed linear terahertz camera is an advanced optoelectronic device based on terahertz wave (0.1-10 THz) imaging. It uses linear scanning or focal plane array technology to achieve fast, non-contact perspective imaging of the object being measured. Its core components include terahertz sources (such as quantum cascade lasers), high-sensitivity detectors (such as superconducting mixers or pyroelectric sensors) and real-time signal processing systems. It can complete high-resolution (
