Abstracts

Polyamides are probably the most successful polymers in the field of highly technical applications. In the past few decades, we have witnessed the introduction of nylon as a replacement for metals and thermosetting materials in many applications in all industrial sectors. As is well known, nylon is a primary choice for applications at high temperatures, due to its excellent thermal resistance. In general, high temperature polyamides should have a heat resistance temperature of more than 200 degrees Celsius. China is the largest market with about 28% market share. Europe is follower, accounting for about 25% market share. The key players are DowDuPont, DSM, EMS-GRIVORY, Solvay, Mitsui Chemicals, Kuraray, BASF, Evonik, Genius, Kingfa etc. Top 3 companies occupied about 62% market share.

The global High Temperature Polyamides market size was estimated at USD 2567.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.20% during the forecast period.
