Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on HMDS Adhesion Promoter competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. HMDS (Hexamethyldisilazane) is the most widely used adhesion promoter in semiconductor manufacturing, primarily employed to enhance the adhesion of photoresist to silicon substrates and oxide surfaces. In photolithography, HMDS reacts with hydroxyl groups on the wafer surface, creating a hydrophobic layer that significantly reduces photoresist lifting, bubbling, and pattern defects. Highly Purified Grade HMDS

HMDS Blend (MP-95, MP-90)s mainly include vapor-phase HMDS, liquid-phase HMDS, and high-purity electronic-grade HMDS tailored for different process environments. Its applications span IC fabrication, memory devices, power semiconductors, sensors, and advanced packaging. With continuous device scaling and the evolution of process nodes, HMDS plays an increasingly critical role in advanced lithography processes, with ever-higher requirements for purity and stability. In terms of market status and outlook, the global HMDS market is expanding rapidly along with semiconductor industry growth, with particularly strong demand in EUV lithography and advanced logic and memory production. Key drivers include stringent yield requirements in wafer fabs, the adoption of advanced lithography nodes, and the growth of downstream markets such as consumer electronics, automotive electronics, and AI chips. At the same time, environmental and safety regulations on organosilicon chemicals are pushing suppliers to develop higher-purity, environmentally friendly, and low-residue HMDS products. Looking forward, the HMDS market is expected to maintain steady growth while shifting toward regionalized production and secure supply chains to meet the strategic demands of global semiconductor manufacturing.

The global HMDS Adhesion Promoter market size was estimated at USD 104.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.60% during the forecast period.
