Report Overview

Hoisting plugs are specialized lifting devices used in construction, manufacturing, and heavy industries to safely lift and transport heavy loads, particularly precast concrete elements, steel structures, and other large components. These plugs are designed to be embedded into concrete or attached to structural elements, providing a secure anchor point for cranes or other lifting equipment. They come in various types, including threaded, swivel, and toggle plugs, each suited for different load capacities and applications. The market for hoisting plugs is driven by the growth in infrastructure development, urbanization, and the increasing adoption of modular construction techniques.
