The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Home Cleaning Robot competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A household cleaning robot is an automated device with autonomous movement and intelligent operation functions, designed to assist users in completing daily cleaning tasks in the home environment. It is usually equipped with sensors, navigation systems, cleaning components and control systems, and can automatically plan paths, avoid obstacles, and perform operations such as vacuuming, mopping, window cleaning, and pool cleaning, greatly reducing the burden of manual cleaning and improving the convenience and hygiene level of life. In 2024, the global production of household cleaning robots will reach 2 million units, with an average selling price of US\$300 per unit. The development trend of household cleaning robots is moving towards higher intelligence, autonomy and multi-functionality. With the advancement of artificial intelligence and sensor technology, cleaning robots can more accurately identify the environment, plan cleaning paths and avoid obstacles, while improving cleaning efficiency through self-learning. In addition, consumers' demand for smart home integration has increased, prompting cleaning robots to work better with home voice assistants and other smart devices. Product design also pays more attention to user experience, including reducing noise, improving battery life and simplifying maintenance processes. In the next few years, the market is expected to continue to see the emergence of more innovative features, such as automatic garbage disposal, stronger obstacle crossing capabilities and enhanced adaptability to different ground types, which will drive further growth in the household cleaning robot market.

The global Home Cleaning Robot market size was estimated at USD 1750.0 million in
