Abstracts

Home Enteral Nutrition (HEN) is a method of providing nutrition to individuals at home who cannot consume food orally or need specialized nutrition support. It involves delivering nutrients directly into the gastrointestinal tract through a feeding tube, such as a gastrostomy or jejunostomy tube. HEN is commonly used for patients with conditions that impair their ability to eat, such as neurological disorders, cancers, or gastrointestinal diseases. This method allows patients to receive long-term nutritional support in a home setting, promoting independence and improving their quality of life.

The global Home Enteral Nutrition (HEN) market size was estimated at USD 28680.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Home Enteral Nutrition (HEN) market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Home Enteral Nutrition (HEN) market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This
