Report Overview:

Controlled atmosphere heat treatment can be applied in several segments of laboratory and industrial facilities where there is a need to heat quality industrial parts. In order for the parts to have consistency in heating, a controlled atmosphere oven is used, which makes it possible to obtain a heat treatment in which the process control is efficient and the parts produced come out as expected. When you want to prevent the reaction of the product placed in an oven from suffering the action of air, it is necessary to use a controlled atmosphere furnace.
