Abstracts

Pierce Horseradish Peroxidase (HRP) is purified horseradish peroxidase enzyme for use in activity assays and conjugation to antibodies for ELISA, Western blot and Research applications. Drivers of the Horseradish Peroxidase (HRP) Market The horseradish peroxidase (HRP) market is driven by its widespread application in various industries, particularly in biotechnology, diagnostics, and research. HRP is a key enzyme used in immunoassays, such as ELISA (enzyme-linked immunosorbent assay), and Western blotting, to detect and quantify specific molecules. Its ability to catalyze the oxidation of substrates, providing a measurable signal, makes it indispensable in diagnostic kits and laboratory procedures. Additionally, HRP's use in the development of biosensors and as a catalyst in chemical reactions is further expanding its demand, especially as the biotechnology sector continues to grow globally. Challenges in the Horseradish Peroxidase (HRP) Market Despite its broad applications, the HRP market faces challenges related to the stability and shelf life of the enzyme. HRP is susceptible to degradation under harsh conditions such as extreme temperatures, pH variations, or storage for prolonged periods, which can reduce its efficacy in applications. Moreover, the cost of producing high-quality HRP and the complexity of its purification process can lead to higher product prices, limiting its affordability, especially in developing regions. To overcome these challenges, advancements in enzyme stabilization technologies, along with cost-effective production methods, are essential to ensuring a sustainable and competitive HRP market. Global horseradish peroxidase (HRP) key players include TOYOBO, Merck Millipore, Thermo Fisher, BBI Solutions, Enzybel International etc. Global top five manufacturers hold a share over 68%. Americas is the largest market, with a share over 50%, followed by Europe and APAC, both have a share about 48% percent. In terms of product, Grade ? is the largest segment, with a share over 37%. And in terms of application, the largest application is diagnostic reagents followed by research.

The global Horseradish Peroxidase (HRP) market size was estimated at USD 64.1 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.40% during the forecast period.
