Report Overview

A hose barb fitting is a unique-looking piece of plastic. It comes in steel or plastic, sometimes brass. It can be in a variety of materials. It's got a barb to it, and the barb holds on to tubing. It's typically used with soft-side tubing, like clear PVC. You push the tubing on and it holds onto it. Sometimes you add a little stability with a hose clamp, but a lot of times, the hose barb holds onto the tube just by itself.
