Report Overview

Hose reel irrigation systems, also called traveling gun systems, consist of a single powerful, portable sprinkler head that sprays water in a circular pattern. These movable sprinklers are installed on “traveling” carts, with a water hose attached. The carts can be positioned wherever necessary, as long as they remain connected to a water source. These sprinklers are best used on: irregular-shaped areas; difficult-to-reach areas and fields that cannot be otherwise irrigated because of ditches, power lines, trees, buildings, etc.
