Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Hot Water Soluble Instant Tea Powder competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Hot-water-soluble instant tea powder is a concentrated, dried tea extract or tea-based premix processed (commonly by spray-drying and/or agglomeration) into a free-flowing powder that disperses readily in hot or warm water to produce tea without conventional brewing; formulations range from pure tea extract powders to flavored or milk/sugar premixes used for ready-to-drink and food-service applications. The upstream of the instant-tea value chain begins with tea plantations and green/black tea leaf procurement, drying and comminution, along with supply of functional additives (sugars, milk solids, stabilizers) and process utilities (steam, energy, drying gases) sourced from agricultural producers and chemical/ingredient vendors; the midstream comprises extraction, concentration, clarifying, formulation, spray-drying/agglomeration, and packaging performed by instant-tea manufacturers and co-packers using specialized dryers and process controls; the downstream includes branded packagers, RTD beverage producers, foodservice suppliers, distributors, wholesalers and retail channels (supermarkets, e-commerce, institutional procurement) plus cold-chain or ambient logistics and aftermarket marketing/brand support. Across 2023–2025, sector expansion projects noted in public filings and trade press include several capacity-expansion and green-field spray-drying lines by beverage-ingredient groups in Asia (China, India), new premix/granulation plants by private label and dairy ingredient integrators in Southeast Asia and the Middle East to serve QSR and RTD demand, modernization projects (automation, energy-efficient dryers) at mid-sized processors in Europe and North America, and pilot facilities for high-value specialty instant teas (cold-extraction and encapsulation trials) at research arms of large tea

manufacturers — collectively these projects focus on higher-throughput spray-dryers, agglomerators and more sustainable packaging integration. 2024 Global Market sales Volume: 32,000 tonnes, Average Global Market Price: USD 10/kg, Market Average Gross Profit Margin: 18%.

The global Hot Water Soluble Instant Tea Powder market size was estimated at USD 321.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.30% during the forecast period.
