Abstracts

Hyaluronic Acid (HA) Skin Care Products refer to cosmetics formulated with HA as an active ingredient. HA is a naturally occurring substance present in the human body that helps retain collagen and elastin fibres in the skin, giving it a plump appearance and promoting hydration levels. Topically applied HA works similarly by drawing water to the surface of the skin and holding onto it, helping to improve skin texture and reduce wrinkles temporarily through enhanced hydration. Various forms of HA are used in skincare to enhance the barrier function, support regeneration processes, balance pH levels, and increase the efficacy of other actives when combined together.
